

PAINT THICKNESS GAUGE

PN: R1154

FEATURES/ ADVANTAGES

- Automatically detects the metal properties
- Built-in precision sensor probe
- Portable and lightweight

APPLICATION/ USE

- Used to measure the thickness of the coated sheet on metal

TECHNICAL SPECIFICATIONS

- Magnetic induction (F-probe) and eddy current (N-probe)
- Measuring range: 0 to 1300um
- 1-4-point calibration, zero calibration
- Adjustable alarm
- Minimum measuring diameter 6mm
- Minimum thickness: F-probe: 0.5mm, N-probe: 0.3mm
- Download data via USB interface Two 1.5v AAA battery
- Made in PRC
