

## VINYL WRAP MAGNET

PN: R3402

### FEATURES/ ADVANTAGES

- Made of high-quality rubber and magnet
- Sturdy and durable
- Strong magnetism
- Free your hands
- No damage to car paint or wrapping film
- Wide range of applications
- Heat Resistant
- Portable

### APPLICATION/ USE

- **HOLDING VINYL IN PLACE:** The magnet holder is used to temporarily secure the vinyl wrap to the surface of the vehicle or object, freeing up both hands for precise positioning and smoothing. This helps installers work more efficiently without needing to use tape or clamps.
- **POSITIONING AND ALIGNMENT:** The magnets help keep large pieces of vinyl in position while adjusting the alignment before the final application. They are particularly useful for holding sections of the wrap in place when working on curves or larger areas.
- **REDUCING CREASES AND BUBBLES:** By holding the vinyl securely, these magnets prevent the material from shifting, which reduces the risk of creases, wrinkles, or air bubbles during installation.
- **WORKING IN WINDY CONDITIONS:** The strong magnetic hold ensures that vinyl stays in place even in outdoor or windy environments, making it easier for installers to handle the material.
- **GENTLE ON PAINT SURFACE:** Vinyl wrap magnet holders are typically strong enough to stick to metal surfaces (like vehicles) without damaging the wrap or the surface underneath.

### TECHNICAL SPECIFICATIONS

- Color: Black
- Size: 63mm x 6mm x 43mm
- Weight: 40g/pc
- Material: Plastic, Rubber and Magnet
- Car compatibility: Universal
- 1 PC/BOX
- Made in PRC
